Apr. 24, 1992

GOD AT WORK!

I can't believe it! God is so good to me. Here's what He did for me today!

I was trying to find out why the IMPORT report was applying an edit flag to this style. It was not obvious. All my initial avenues didn't pay off. I was stymied. Along the way I had ~~be~~ identified one possible cause, and ~~mark~~ marked it with a pencil, but I kept on going, because it didn't make perfect sense (it seemed incidental). As a matter of fact, it seemed illogical that it could really help. So I decided to use Linclite to ~~go through~~ watch the program working step by step. So I ~~removed certain~~ colored out certain lines that would delete PREC and flag to SECUR so I could run it over & over. Then I regenerated Import without those lines. Linclite was missing a file, and I knew only Tina could help me correct that problem. It was 4:15 on a Friday, and I knew I had better get to Tina soon or she'd be gone for the weekend. Just then, a little voice said "The answer is right in front of you". And I brushed it

off, thinking, "that's just me thinking wishfully." But the voice came back again and said "Do that and you'll be fine". So I considered it logically, but it didn't make any sense. The more I thought about it, the less sense it made. ~~So~~ But I told myself to trust the voice. Exercise complete faith in God. Then I told myself it doesn't make sense and I'd be losing time on this whimsy. I'd better call Tina right now, I thought.

"Trust me" said the voice.

So I paused and said "OK". It seemed completely illogical and foolish to do so; and if it didn't work, I would have lost my shot at calling Tina. But I told myself to trust God, I remembered how ~~the~~ faith in Him was the true curative for the blind beggar and the woman with the hemorrhage and the Centurion's son. Let me tell you, this was a hard thing to do. I felt foolish the whole time, but I did it. I replaced the colored out code in `IMPORT` and regenerated it. `IMPORT` takes a long time to `GEN`. The whole time I struggled with how foolish I felt, but still decided to wait it out and do it as God said. I set up a new document, reinitialized the `SECUR` flag (Import status), and started a new Import. Then I ~~put~~ printed the results via `PARGAL`. `VOUA!` Problem solved! I couldn't believe my eyes! I stared at my plague. "In all your ways acknowledge Him and He shall direct your paths" and smiled then silently laughed til my eyes watered. He ~~is~~ is so Good!

I can trust Him!

gone!

Thanks to God!
My buddy!
